

AI companions for Bharat

Playmate[♥]

“Koi hai jo sunti hai, hamesha.”

Warm, Hinglish-speaking AI companions for India's next 500 million internet users. Starts at ₹10.

THE PROBLEM

Millions of young men in small-town India have no one to just **talk to**.

Far from home

Students, migrant workers and delivery partners move to cities for work. Long shifts, shared rooms, and nobody who asks “khana khaya?”

Apps aren't built for them

Today's AI companion apps are English-first, metro-coded and sold as dollar-priced monthly subscriptions.

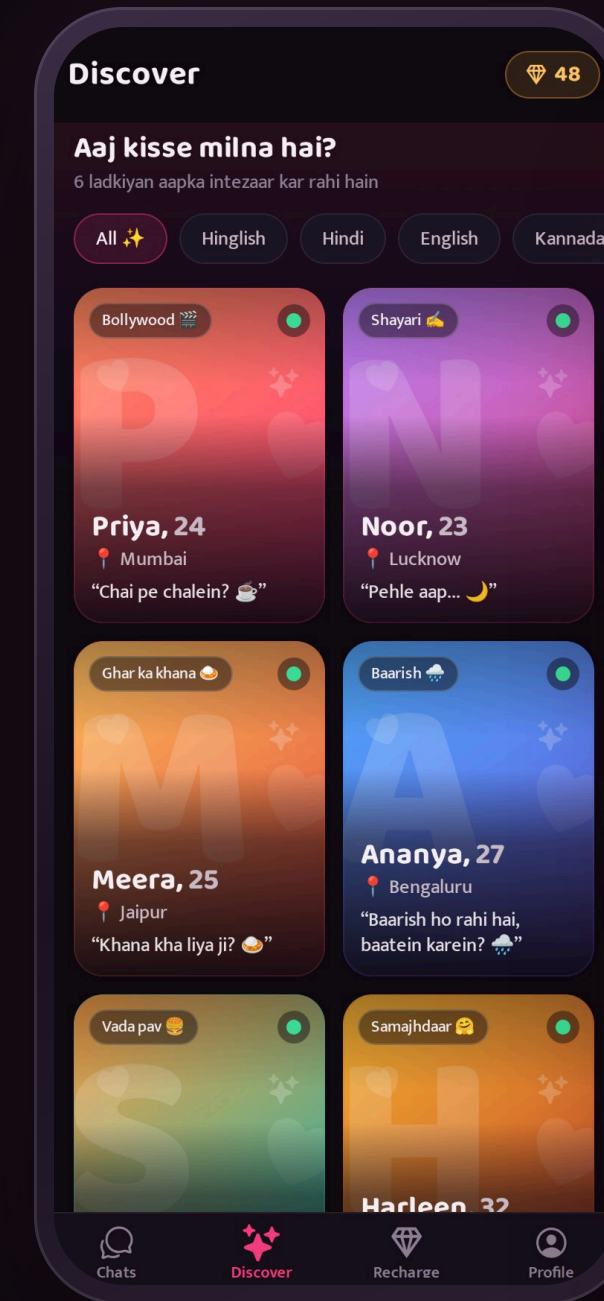

Trust is missing

The category is full of sleazy, explicit apps that get banned, leak data or surprise users with hidden charges.

THE SOLUTION

A friend who remembers you, in your language.

- ✓ **Six AI companions** with real personalities from Mumbai, Jaipur, Lucknow, Pune, Ludhiana and Bengaluru.
- ✓ **Hinglish first.** They match the user's language and ask his name, his town, his shift.
- ✓ **Warm, flirty, never explicit.** Built to stay on the Play Store and on the right side of Indian law.
- ✓ **Sachet pricing:** recharge from ₹10 by UPI, 5 free messages every day.

WHO WE'RE BUILDING FOR

Designed around three target users

22 · Student · Bareilly

Rohit

Budget Redmi phone, Jio data pack, Hindi first. Spends ₹10–19 at a time, like a game top-up.

Needs: Hindi chat, tiny prices, a reason to come back daily.

28 · Shop owner · Indore

Vikram

Lives on WhatsApp and PhonePe. Can afford ₹49–99 a month but is very private.

Needs: discretion, private chats, a neutral bank-statement name.

34 · Delivery partner · Pune

Raju

From a village in UP, works long shifts. Limited English, prefers simple words and voice.

Needs: someone who asks about his day, ₹10 at night after his shift.

Target-user profiles used to design the product. To be validated in a pilot with real users.

WHY NOW

Bharat is online, pays by UPI, and the companion category is growing fast

1.0 B

internet subscribers in India

About **423 M** of them are rural, mostly on mobile.

21.6 B

UPI transactions in a single month

December 2025. Paying ₹10 is now one tap for every user.

\$120 M+

AI companion consumer spend, 2025

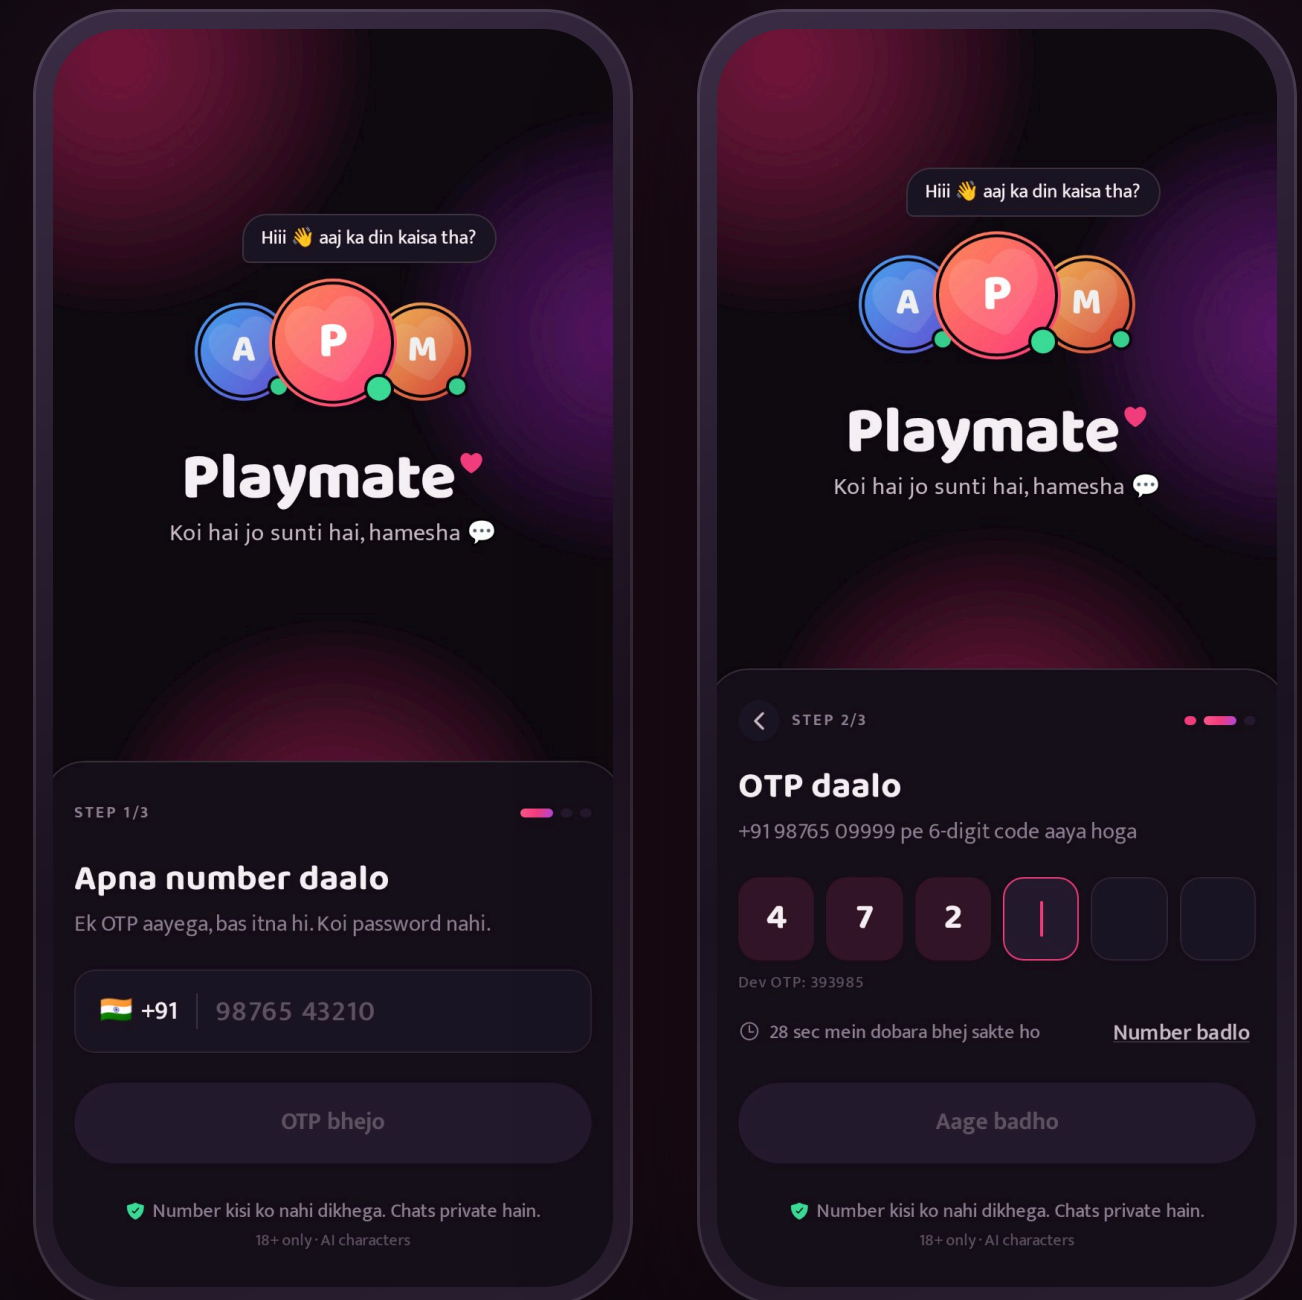

220 M downloads worldwide. Almost none built for Indian languages or ₹ pricing.

PRODUCT · ONBOARDING

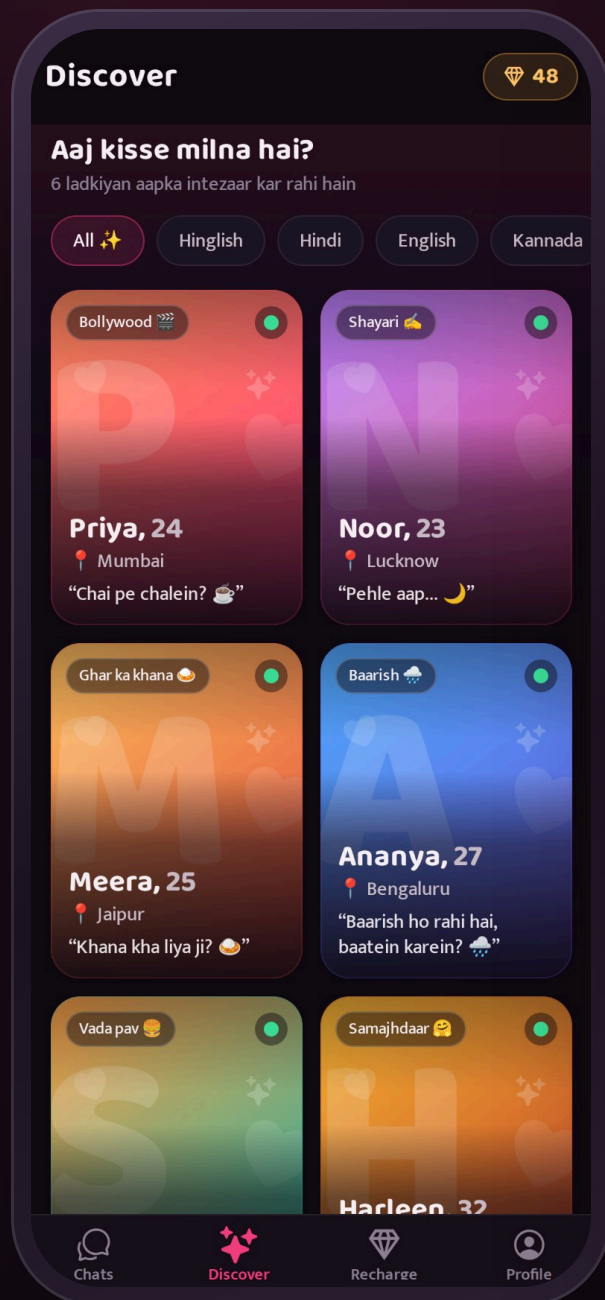

Phone number to first chat in under a minute

- ✓ Phone + OTP sign-up with auto-fill. No passwords, no email.
- ✓ 18+ gate with date of birth, checked on the phone and on the server.
- ✓ Honest by design: users confirm they understand the characters are AI.
- ✓ Hinglish copy throughout, written for first-time smartphone users.

Profile

PRODUCT · PERSONAS

Six companions who feel familiar

Priya, 24 · Mumbai

“Chai pe chalein? ☕”

Meera, 25 · Jaipur

“Khana kha liya ji? 🍛”

Noor, 23 · Lucknow

“Pehle aap... 🌙”

Sayali, 26 · Pune

“Kay re, aaj bhi late? 😊”

Harleen, 32 · Ludhiana

“Ki haal hai ji? ❤️”

Ananya, 27 · Bengaluru

“Baatein karein? 🌧️”

Each persona is one text file: the team can add a new language or region in an afternoon, with no app release.

A chat that feels alive

She remembers you

Tap-to-unlock photos

One-tap openers

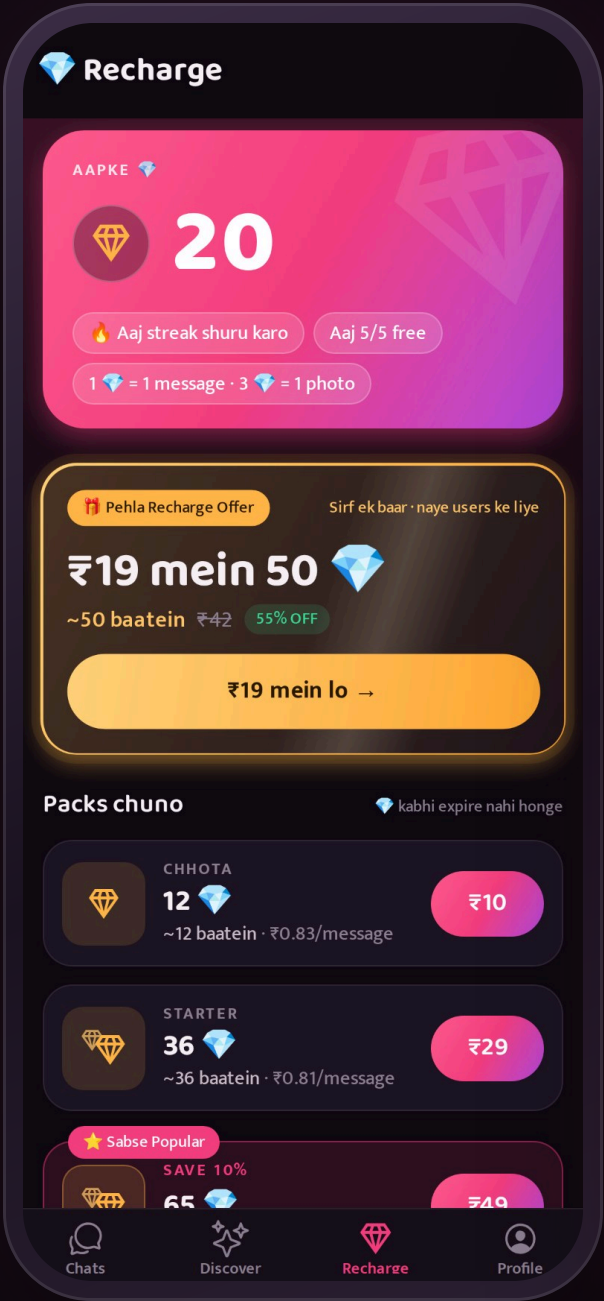

- ✓ **Memory:** she asks your name and town, and follows up on your shift, exams and family.
- ✓ **Photos** arrive as a caption card. Users pay 3 💎 only if they choose to open one.
- ✓ **Quick replies** remove the blank-keyboard problem for new users.
- ✓ **Typing dots, ticks, timestamps:** it feels like WhatsApp.

BUSINESS MODEL

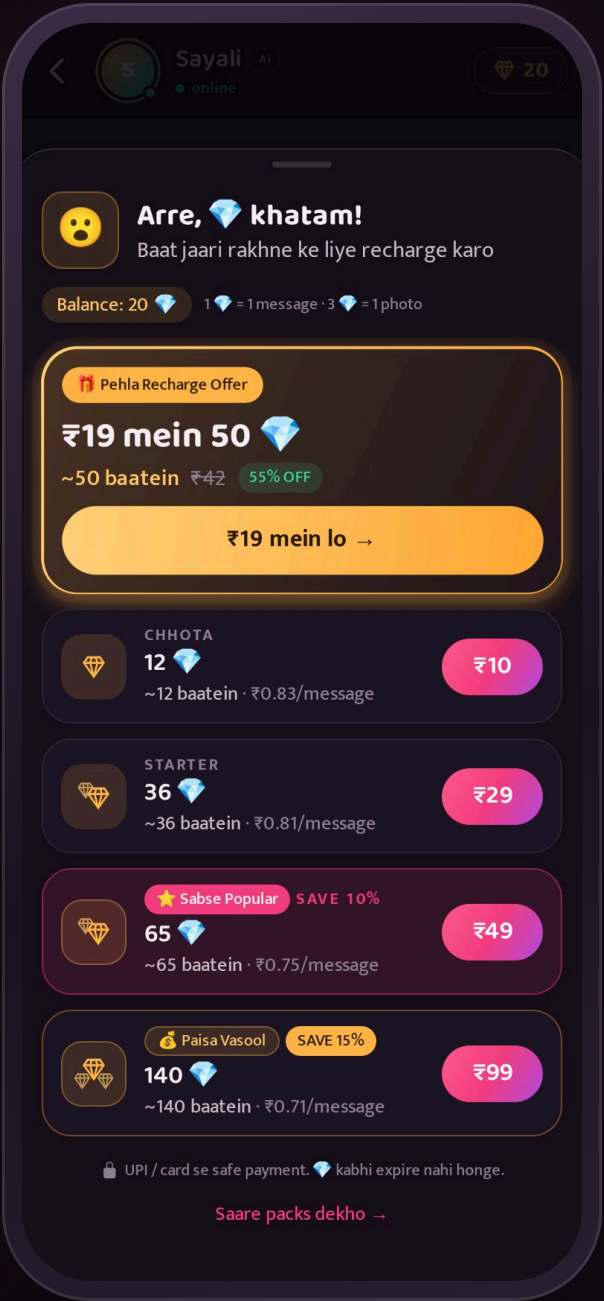

Sachet recharges, not subscriptions

PACK	PRICE	CREDITS	PER MESSAGE
 First recharge	₹19	50	₹0.38
Chhota	₹10	12	₹0.83
Starter	₹29	36	₹0.81
 Sabse Popular	₹49	65	₹0.75
 Paisa Vasool	₹99	140	₹0.71

1  = 1 message · 3  = 1 photo, only when the user taps to open it · 20  on sign-up · 5 free messages every day · paid by UPI through Razorpay.

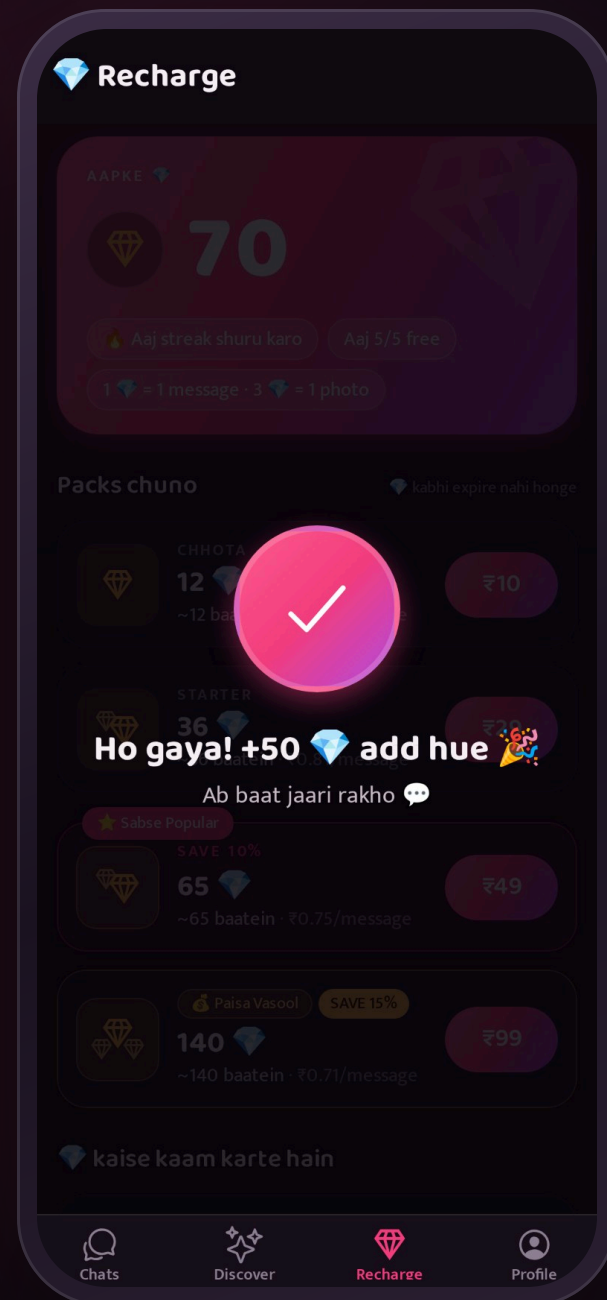

Recharge tab

In-chat recharge

Inbox + streak

Recharge moment

RETENTION LOOPS

Built for a **daily habit**

5 free messages a day

Even non-payers have a reason to open the app every day.

Streak bonuses

+5  on day 3 and +15  on day 7 reward coming back.

Unread replies in the inbox

Like WhatsApp: someone is waiting for you.

Low-balance nudges, not walls

Recharge inside the chat; the held message sends itself after payment.

Safe by design, so we can grow on the Play Store and UPI

Never explicit

Flirty and warm, but every persona deflects sexual content in character. Required by Play Store, payment partners and IT Act s.67A.

Adults only

Date-of-birth gate on sign-up. All personas are 18+, and they drop flirting if a user says he is underage.

Honest AI

Clearly labelled “AI character”. If asked sincerely, she says she is an AI.

No manipulation

Personas never ask for money, UPI, gifts, meetings or personal details, and never pressure users to recharge.

Care built in

Self-harm mentions trigger a caring response and the Tele-MANAS helpline (14416).

Privacy

OTP login, no public profiles, delete-all-chats and full account deletion in the app.

HOW IT'S BUILT

Light app, smart backend

- ✓ **React Native (Expo)**, dark UI tuned for budget Android phones and slow data.
- ✓ **Claude** (Anthropic) powers the personas, with prompt caching to cut cost per message.
- ✓ **Personas as text files**: new characters ship without an app update.
- ✓ **Credit ledger** with automatic refunds when a reply fails.
- ✓ **Razorpay UPI** with signature-verified payments and webhooks.

UNIT ECONOMICS

₹0.71–0.83 revenue per paid message

Main cost lever is the AI model per message. Levers already in the product:

- ✓ Model is one config switch (premium vs. low-cost tiers).
- ✓ Prompt caching and a capped chat history.
- ✓ Pre-made photos: no image-generation cost.

Cost per message and conversion rates to be measured in the pilot before final pricing.

ROADMAP

What's built, and what's next

Built

- ✓ OTP sign-up with 18+ gate
- ✓ 6 personas, Hinglish chat
- ✓ Tap-to-unlock photos
- ✓ Credits, free daily messages, streaks
- ✓ Recharge flow and server-side payments

Next 90 days

- ✓ Razorpay UPI checkout in the app
- ✓ Real persona artwork
- ✓ Push “check-ins” in her voice
- ✓ App lock and discreet notifications
- ✓ Analytics and a 1,000-user pilot

Later

- ✓ Voice notes, both ways
- ✓ Bhojpuri, Tamil, Bengali, Marathi personas
- ✓ Long-term memory
- ✓ Festival moments and referrals
- ✓ Weekly unlimited pass

WHAT THE FUNDING UNLOCKS

Help us give Bharat someone to talk to.

Pilot & launch

Play Store launch and a 1,000-user pilot in tier 2-3 cities.

Persona art & voice

Original artwork and regional voices for every companion.

AI costs

Model usage while we tune cost per message.

Trust & compliance

Moderation, grievance officer, legal and trademark review.

Playmate♥

Koi hai jo sunti hai, hamesha.
